

FRIDAY 6<sup>TH</sup> MAY at 01:40

Hope. As you know what power there is in that word, for mankind without hope is nothing. Hope is in every fabric of our being - everything we do, every thought we have, every action and reaction contains and needs hope. Hope is another word that humans have come to underestimate the true meaning of.

Hope acts upon the conscious state of being by offering direction and desire. Take any thought you have, any decision you have made, any action and you'll discover hope of some level.

Even as you transcribe our words, you are embracing hope. You hope the words are clear to read. You hope the words are coming from us, you hope they make sense.

Every being with a conscious mind is stimulating it with the power of hope.

Hope is not just a meaningless desire, an empty wish, a wasteful thought. Hope is

everything, for without it, nothing can exist.

Hope is not something mankind can ever master or control. It's an invisible force at work in everything.

As you're writing these words, I can see your mind opening further as you're realising the truth in our message to you tonight.

Take the hope away from someone and you take away their life-force. Their very being depends on the presence of hope.

Hope is strength, not weakness.  
Hope is meaningful, not meaningless.  
Hope sparks desire.

Hope is more than a word - it is a force. Can you understand that? And what is a force, if not an energy. So, hope is an energy force. As we said at the beginning, it is in every atom, every fabric of your being.

Never underestimate the power of hope.

When one enhances hope for some desire, the energy force of hope is called to action and from that, the universal consciousness can respond.

My dear friend, when you read these words back, you'll truly appreciate the philosophy, the message and the deeper understanding of these invisible forces that drive humans, without their realising where the drive is coming from.

Hope, may only be four letters when we treat it as a word, but hope is everything, like God.

If you were given the task of counting how much hope is involved with all of your actions each day, you would probably lose count after the first hour.

To embrace hope is to embrace life, power, & reality, by desire and much more. What do you hope for tomorrow?

We will leave you with that message for you to contemplate. Hope is part of everything and we hope you've enjoyed our philosophy with you. We 'hope' you sleep well.
