

Yes yes, I've been ready and
waiting for a while dear
boy.

Now, I want to cut to the
chase with today's words
for you, and in particular
your readers. The one or
two will know I'm talking
directly to them. Good. Take
my message and use it.

Some of your readers have
come to the belief that
what it is they need to
know is entirely about
comparing their personal

connection to the spirit world. They believe what they want to hear is the how-tos and nothing else. Everything else is of no value to them, they think. Well, they couldn't be further from the truth, and in thinking that way they are showing their lack of understanding in the growth they need to make. Although I'm not taking directly to you, my medium, let it be known that you were once that bad too. I know I'm sounding a

little tough over this, but
lets be honest, sometimes
you have to shout to get
deaf ears to hear.

Earth is filled with mediums
that have learned the
pendulum bell techniques for
connecting. A few of them
are quite all right too. But
the vast majority have only
a shallow understanding
of their roles as mediums.

Their focus is short range
and facts w/ specific and
knowledge. You'll hear them
say, I can do readings,

bank I'm not good at
philosophy. And there, my
friends is where there
problems begin an end.
They don't understand
the subject they can
suppose to represent.

If you want me to tell you
how to fixer for your
medication improvement, I
won't have! Broaden your
approach. A hunter drags a
a fishing net that is only
a few feet wide is only
ever going to catch a
few fish. The hunter with

the super wide net will catch more fish, every trip to sea.

The medium will only a break under ~~demands~~ demands of their work with spirit will only ever get a few connections now and then. But the medium with the broader experience the wider net if you like, will always get better connections. ~~deeper~~ deeper connections and greater clarity in their work.

So let me tell you what

way forward will bring
you better results and
greater understandings.
I'll make it simple

① Educate yourself on this
subject. Become obsessed
if you have to. In
best mediums or ways
where.

② Put what you learn into
practice until you own it
and it is engrained in
you.

③ Drop the word trust and
replace it with know.
You know spirit is with

you. You know they will be there every time you need them. You know their signs, their signals, their methods.

That's my three pointers for you. Those should take you under a minute to read, but should be your duty card for the rest of your time on earth.

Now, tell me, what are you ready to advance

your knowledge?

How well do you know
your self? Yes with a
confident letter please. You
Self

How passionate are you about
your work with spirit?

Do you wake up every day
and know you will learn
something that day?

I was passionate on earth
about my membership
every single day and
night. I still am, as you
can tell.

You need to be too. Be
passionate about yourself
and your self.

My medium today seems to
want to use a portion of
his mind to try and work
out who I am. Dear boy,
how is that important?

I'm not going to apologise for
speaking today with
my passion displayed. If
you want it all pretty,
then art friends of
teachers where you are
that will do that.
Heed my words today and

Let the changes begin
forthwith.

I want to thank my
medium for transcribing
my words at such speed
today. I only had to
correct him once! Nice
work friend.

Goodbye to you all, and
remember my words. The
secret to your future as
a great spiritualist medium
are written in these pages.
Trusts all.
