

Good day to you Sir. I find you well and relaxed, ready for my message this day. My name, when I was on Earth, was Margaret. I chose a different name for this life. I am now known as Soulseeker.

It was my passion on earth to discover what I could about the living being soul and I carry on with that work here today.

The soul is an infinite part of all of us. Even in this life form we have a soul. The soul is the spark of life that formed who we are and who we become. It originates from the highest dimension and descends to grow, to become, and to achieve its ultimate desire. That is, to ascend to be welcomed back in the highest kingdom known - that of the Divine.

The soul's purpose is above and

beyond the desires from life itself, though these aspects help form it through the spirit of the soul. The spirit is unique in that it is part of the soul and of the body or lifeform. Your spirit, and every other spirit are therefore the engine, the creator, the force that listens to both the body and the soul.

The soul, however, wants only to ascend back to where it came, to be part of the Divine and eternal life. The soul only absorbs that which is good for it.

Did you know that the spirit of a person cannot be bad. It may not appear so, from your viewpoint as a living body, but believe me, that is how it is. If the body living wastes its life, doesn't achieve any good, then it doesn't effect the

spirit or the soul.

The misguided body, the evil creators, the bad'uns, as you call them, still have a spirit and a soul that sole purpose is to ascend. It is only the body that doesn't experience that during its lifetime.

The soul survives all. The spirit can enter a new body and try again influencing that new body to not make the same mistakes.

Can you now understand a little clearer why life is said to be eternal. It may take immeasurable time for a soul to reascend to the Divine. But that will happen and take many of your lifetimes to achieve.

Many body's on earth fear talking about the soul and its

purpose. My findings suggest this to be because of a lack of clear definition. Many of your type of people don't know the truth and have not taken the time to understand it correctly.

No doubt, my opinions are based on my understanding, and no doubt I may be off with a few details. But what I've shared with you is my understanding, based on my extensive research, both on earth and here in the continuation.

I'm sure you'll do some research and discover at least one of my publications. Last I knew, there are still some copies around.

Thank you for listening to me. I hope that wasn't too deep for you.

Goodbye.
